21 March 1958

MEMORANDUM FOR: HTAUTOMAT/OCR

SUBJECT : Forwarding of Information on the Standard
Index N9 System

When I was visiting the Navy, I learned of the standard indexing system for aerial photography which the Air Force has instituted and with which the Navy is cooperating. I requested copies of the regulations, and they are attached. I would appreciate your and Art's views on whether we can cooperate with them in their endeavor. Furthermore, I am interested in whether this procedure would not help control operational information (as compared to disseminating plots).
